PROJECTS

E-commerce

[Link](#) | [GitHub](#)

- Built a MERN stack e-commerce app with **React.js** for a dynamic user interface and **Context API** for state management.
- Built the backend with **Express.js, Node.js, and MongoDB**, plus secure login features.
- Added a cart system to add products and **Braintree payment system** for secured payment gateway.
- Designed an admin panel for easy product and order oversight, styled the whole app with **Bootstrap**.

Movie Listing App

[Link](#) | [GitHub](#)

- Developed a movie browsing app using **React.js** and **Redux** for smooth state management, tapping into TMDB API for rich movie details.
- Integrated with **TMDB API** for a vast collection of movie information.
- Featured genre filters and trending movie sections for easy browsing.
- Included functionality to watch movie trailers.
- Styled with **SCSS** for sleek, responsive design.

Chat App

[Link](#) | [GitHub](#)

- Built a chat application utilizing the MERN stack, ensuring a comprehensive full-stack solution.
- Implemented React JS for dynamic and responsive front-end user interactions.
- Utilized MongoDB for efficient data storage and retrieval, enhancing chat functionality.
- Integrated Express JS and Node.js for robust backend processing, supporting real-time messaging.
- Enabled image sharing features, providing an enriched chatting experience for users.

Game Listing App

[Link](#) | [GitHub](#)

- Developed a game-listing website using **React.js** framework with genre.
- Used **rawg.io API** to fetch data and display.
- Applied **Tailwind CSS** for responsive and stylish interface design.
