

Suvankar Das

Full-Stack Developer · React · Next.js · Node.js

iamsuvankar25@gmail.com | +91 7278916128 | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Professional Summary

Full-Stack Developer with nearly 2 years of experience designing, building, and maintaining production-grade web applications in a fast-paced startup environment. Led frontend development of a government-scale civic portal serving over **1.5 lakh registered users** and contributed to the **PP Office platform**, currently used by senior government law officers of the Calcutta High Court and West Bengal Police. Seeking a full-stack or frontend engineering role to deliver high-impact products within a growth-oriented team.

Professional Experience

Full-Stack Developer

Feb 2025 – Present

Vyoma Innovus Global Pvt Ltd

- Engineered the West Bengal government portal for TOTO (electric rickshaw) driver registration: a 40-page application featuring Aadhaar-based KYC verification, government payment integration via the GRIPS gateway, automated PDF and Excel report generation, and secure document management using AWS S3 and SFTP.
- Delivered a platform that has processed over **1.5 lakh driver registrations**, each resulting in an official government authorization certificate, with a multi-tier admin panel used by **30+ administrators** for review, approval, and reporting workflows.
- Served as the **sole frontend developer** for the vehicle registration portal and made significant backend contributions to the PP Office platform, a judicial-police case coordination system used by senior government law officers. Also delivered full-stack features for a field officer project management platform serving 100+ district-level users.
- Gained deep expertise in sustaining production systems at scale, spanning RESTful API design, JWT-based authentication, state management, and cloud infrastructure. Tech stack: Next.js, React.js, TypeScript, Redux, Node.js, Express.js, MongoDB, JWT, Redis, AWS S3, Docker.

Frontend Developer

Sep 2024 – Dec 2024

Freelance

- Collaborated within a cross-functional team to build a fruits and vegetables e-commerce platform using React.js, JavaScript, HTML, and CSS, delivering bug fixes across the checkout flow and API integration layer.
- Spearheaded the state management refactor, migrating the application from localStorage and Context API to **Redux**, improving reliability and establishing a scalable architecture pattern for the team.

Freelance Content Writer

Jan 2020 – Aug 2024

Self-employed

- Authored **1000+ articles** across healthcare, tourism, and technical products for diverse clients, building strong research, documentation, and communication skills.

Projects

AI-Powered Microservices Blog Platform

[GitHub](#) | [Live](#)

- Conceptualized and built this platform to develop hands-on expertise in distributed systems, motivated by a real client requirement and a goal of understanding how enterprise-scale systems are architected beyond monolithic patterns.
- Architected 3 decoupled microservices (User, Blog, Author) with Docker containerization, a GitHub Actions CI/CD pipeline, and RabbitMQ for asynchronous inter-service messaging, with end-to-end deployment on a self-hosted Linux VPS.
- Integrated Google Gemini AI, Redis caching, Google OAuth with JWT, Cloudinary for media management, and a Next.js 15 SSR frontend for optimized SEO and performance. Tech stack: Next.js, Node.js, Express.js, MongoDB, Docker, RabbitMQ, Redis, GitHub Actions.

Skills

- Frontend:** React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Redux, Zustand, Shadcn/UI, Custom Hooks, Responsive Design
- Backend:** Node.js, Express.js, RESTful APIs, JWT Authentication, RabbitMQ, Socket.io
- Databases:** MongoDB, Redis
- Tools & Infra:** Git, GitHub, Docker, AWS S3, SFTP, Postman, VS Code, Linux Server (VPS)

Education

University of Calcutta Bachelor of Science (General)

June 2016 – Aug 2019

Majors: Physics, Mathematics and Computer Science
Kolkata, West Bengal, India
